

RCS - RISK & COMPLIANCE SYSTEM

ADAPT TO THE NEW ENVIRONMENT!

New regulations and changed market conditions has lead to an increased focus on management of operational risks within financial institutions. In order improve performance and comply with the legal framework companies need to manage operational risk in a structured and efficient manner which allows for easy monitoring and reporting. In conclusion, companies need to adopt new methods of working with operational risk.

zeb and C2 Management offers an efficient tool to meet these challenges. Our solution improves the productivity of teams working on risk issues, facilitates compliance with relevant regulations and increases the risk awareness throughout your organization. RCS also provides an overview of the organisation's risk exposure and allows for comprehensible reporting which in turn enables informed decisions by senior management and the board of directors.

The tool is packaged as a SaaS system and is accessible via a web browser from your workstation, therefore implementation and maintenance places virtually no requirement on your IT organisation. When implementing RCS your organisation will also gain access to the expertise provided by zeb's market leading consultancy services.
