

**IN A HIGHLY COMPLEX AND CONSTANTLY
CHANGING REGULATORY ENVIRONMENT
ZEB NORDICS ENABLES FINTECHS TO
FOCUS ON THEIR CORE BUSINESS**

RISK, COMPLIANCE & CONSULTING SERVICES

Sweden is at the forefront of the digital development in the financial service industry. Progress is moving rapidly, along with the regulatory requirements. As many FinTechs already have discovered, the financial services industry is a highly regulated market.

Regulatory requirements are threatening to harm innovation through strict licensing conditions and hampering startup initiatives due to near-overwhelming complexity.

zeb will help you to navigate through this regulatory storm, allowing you to focus on your core business development and innovative solutions. Together with us, you can quickly become regulatory compliant, stay competitive and ahead of the challenges.

Let zeb assist you with our 360 degrees service approach and extensive expertise, within the following areas:

- Financial Law – qualified advice and services in the regulatory and legal area, as well as outsourcing of the client’s legal function
- Risk & Compliance – advisory services within the areas of Risk Management, Compliance and Internal Audit, as well as outsourcing of specific functions
- Consulting – management consultancy services within areas such as Treasury, Asset Management, Finance, IT Management & System Integration and Organization & Transformation

We look forward to hearing from you!
